college of commerce
2019 - 2021

ABOUT

Frontend Developer skilled in HTML, CSS, JavaScript, React, GSAP, and WordPress, focused on responsive design and interactive UI development. Continuously improving technical skills and seeking opportunities to contribute to production-level frontend projects.

WORK EXPERIENCE

- Intern Front-end Developer** Kodewise Technologies LLP May 2025- NOV 2025
- Worked on building and updating web pages using HTML, CSS, and JavaScript for new and existing features.
 - Assisted in identifying and fixing UI and functionality issues, learning to debug real project code.
 - Updated website content, pages, and posts while maintaining layout consistency and responsiveness.
 - Collaborated with senior developers and team members, followed instructions, and implemented feedback to improve code quality.
 - Participated in team discussions and agile workflows, learning user-centered design and modern frontend practices.

PROJECTS

- Employee Dashboard (Personal Project)** 4 MONTHS
- Developed a role-based dashboard (Admin, Super Admin, Employer) with access-controlled UI rendering.
 - Built frontend modules like leave management and task assignment using HTML, CSS, and JavaScript.
 - Implemented time tracking and task monitoring features with a focus on usability and data clarity.
 - Integrated frontend with PHP and MySQL to handle backend communication and data flow.
 - Independently managed the end-to-end development lifecycle, from database design to deployment.
- Smart Job Portal (Backend System)**
- Technologies:** C#, ASP.NET Core Web API, SQL Server, ADO.NET, React (basic)
 - Description:**
 - Developed a backend-focused academic project to understand API development and database connectivity.
 - Worked on integrating backend APIs with frontend to learn complete request-response flow.
 - Key Contributions & Learnings:**
 - Created basic REST APIs using ASP.NET Core Web API for CRUD operations.
 - Used ADO.NET (SqlConnection, SqlCommand, SqlDataReader) to interact with SQL Server.
 - Implemented simple user registration and job application workflow.
 - Designed basic database tables and used stored procedures for database operations.
 - Tested APIs using Postman and handled basic validation and error scenarios.
 - Learned how frontend and backend communicate using JSON data format.
